Description

All maths (including GCSE) courses are free, subject to availability. All our courses are part -time and run over a duration of up to 16 weeks. Courses start in September or February, but you can enrol at any time throughout the year (with the exception of GCSE). The start and end times are school friendly enabling you to drop off or pick up children and evening classes are available. We will focus on using maths to solve problems found in everyday life as well as in the workplace. You will develop independent learning skills and confidence using maths in a range of contexts. GCSE Maths - Gaining a GCSE Maths qualification is essential for many career pathways. Our year long course will provide you with the materials and resources to work towards achieving the qualification. You will develop maths skills and cover topics such as number, algebra, graphs, shape ratio, proportion and rates of change, geometry and measure, pythagoras and trigonometry, and probability and statistics. This course is only free if you meet the residency requirements and for GCSE if you have not achieved a grade C / or grade 4 previously. Before starting your course you will need to attend a skills scan to ensure you are joining the most suitable course for your needs. Prior qualifications will be taken into consideration where relevant. We have skills scan dates available at different times during the year, please email tacc@thurrock.gov.uk or phone 01375 372476 for available dates and times.
